

Technology and Diagnostic Instruments	
Vocabulary Strategies that Boost Students' Reading Comprehension (Grades 2-6)	A video training program that introduces a variety of strategies that expand the listening and reading vocabularies of elementary age students. As children increase their reading vocabularies, they boost their reading comprehension and progress to read more complex texts.
Strategy Instruction in Action	A set of two different DVDs that contain a total of four different programs: Program 1: Creating a Culture of Thinking Program 2: Modeling Questioning in a Reader's Workshop Program 3: Reading and Understanding Nonfiction Program 4: Using Strategies to Enhance Book Club Discussions.
When Students Write	A set of two different DVDs and a teacher guide containing a total of four different programs: Program 1: Building a Writing Community Program 2: Teaching Writing Skills in Context Program 3: Literature That Supports Writing Program 4: Craft Lessons to Stretch Young Writers.
HP Probook Laptop	Available for faculty only
InFocus Projector	Available for faculty only
Visagraph II with Test Booklet	An <u>Eye Movement Recording System</u> to diagnose children's eye-movement control and motility.
Visagraph III with Test Booklet	An <u>Eye Movement Recording System</u> to diagnose children's eye-movement control and motility.
Keystone View Vision Screener	A quick, convenient vision screener that tests for acuity (monocular and binocular), color blindness,

	peripheral vision, and glare recovery.
AMBCO Audiometer	A hearing test presented with tones to the left or right ear. Children respond when the tone is heard by pushing a switch.
